

8.	(c)	<p>Search would be improved, for example, reduces the amount of data entered to retrieve details for a particular appointment.</p> <p>Automatically incremented and added at the time the record is created meaning no chance of duplication.</p> <p>It is simpler to create join conditions on complex queries.</p> <p>Surrogate keys are immutable; without a surrogate, changing an appointment would mean changing part of the primary key.</p> <p>Easier to reference historical data.</p>	2	<p>1 mark for each of two benefits of a surrogate key relating to scenario.</p> <p>Note: accept 'reduced search time' but not 'faster'.</p>
