

	(e)	<p>Query Output: John Smith</p> <p>Explanation: For example: The query will select the only record from the <code>Appointment</code> table that has no entry in the <code>stylistID</code> field. This record has a <code>customerID</code> of 1 which matches the customer name in the expected output.</p>	2	<p>1 mark for query output</p> <p>1 mark for explanation of how this output would be generated.</p>
