MARGIN

The program asks the user to enter their username, their five-character password and the gift card number. The updated balance in the user's account is then displayed.

- (a) Identify three processes that will be carried out by the program.

3

Input(s)	Username, password, gift card number
Process(es)	
Output(s)	Display new balance

10. (continued)

- (b) Using a programming language of your choice, write the input validation code to confirm that the password entered has five characters.

4

- (c) Test data will be used to ensure this input validation works correctly.

Complete the test table below.

2

Type of test	Input	Expected result
	As4G5	Program will continue
Exceptional		Error message, ask to re-enter
