

6. EcoVenture is a walking club. The club website allows registered walkers to record details about walking routes they complete.

Data about the walkers and their completed walking routes is stored in a database with four related tables. The attributes in each table are listed below.

Route	Walker	Hill	Walk
<u>routeID</u>	<u>walkerID</u>	<u>hillID</u>	<u>walkerID*</u>
routeName	walkerName	hillName	<u>routeID*</u>
routeLength	walkerExperience	hillType	<u>walkDate</u>
routeDifficulty	walkerDOB	hillHeight	walkStartTime
hillID*			walkDistance
			walkEndTime
			walkDifficulty

Explain why the Walk table would benefit from the introduction of a surrogate key.
