	(d)		• set running total to 0
			• loop 365 times
			• running total adding `guests` to total in loop
			• use of incrementing array index in running total
				4	If a collection loop is used award the last two bullets for use and increment of the array. eg
					
					``
					FOR EACH value FROM guests DO
					  SET total TO total + value
					END FOR
					``
					
					``
					for value in guests:
					  total = total + value
					``
