| 11. | (a) | (i) | • conditional loop
• correct loop condition for valid data from 5 to 75
• input within the loop
• error message displayed within loop | 4 | Where candidate uses a post conditional loop the error message must be contained within an if statement

Where candidate does not use a loop, one mark may be awarded for the error message where attached conditions are correct

If the loop is missing the start/end of the loop assume that everything above or below the start/end is inside the loop

Distances in the question are real values so conditions <=4, >=76 are not valid |
