**9.** A new website called Stray Tracks allows music fans to store and share details of their music collections with other users of the website.

When browsing a user's music collection, a gallery of album covers is displayed. The gallery layout is controlled using a media query.

Layout 1   Layout 2

Some of the incomplete CSS and HTML code used to produce these layouts is shown below.

CSS

```
…
body{margin:auto;}
nav {height:35px;}
h1 {display:inline; font-size:28px;}
nav ul li {width:150px; height:20px; font-size:16pt;
float:left;}
@media screen and (max-width: 460px) {
    nav {height:70px;}
    nav ul li {width:100%; font-size:8pt;}
    …
}
```

HTML

```
<header><h1 id="mainHeading"> Stray Tracks </h1><header>
<nav><ul><li> <a href="store.html"> Store </a></li>
<li><a href="collections.html"> Collections </a></li></ul>
</nav>
```

(a) Describe when the media query would be used to generate Layout 2.   **1**

(b) Explain why the `nav height` value is larger in the media query than in the rule `nav {height:35px;}`.   **1**

(c) Explain, making reference to the main heading, Stray Tracks, why the CSS is incomplete.   **1**
