**16.** A feature is to be added to an online shopping website that allows the user to click on the image of a product to see a different, larger, image of the same product.

An example of the intended effect is shown below.

before click

after click

earBuds1.jpg

earBuds2.jpg

The code used to implement this feature is shown below.

JavaScript Code

```
function changePic() {
    document.getElementById("budPic").style.height="200px";
    document.getElementById("budPic").style.width="200px";
}
```

CSS Code

```
#budPic {height: 100px; width; 100px;}
```

HTML Code

```
<p> Click on the image below to see it in more detail. </p>
<img src="earBuds1.jpg" id="budPic">
```

State two reasons why this code is not fit for purpose. **2**
